

## Summary

Survey ID: 13

Gender: Female

Age: 67

Location: Malda, India

No of household members: 6

The person interviewed has no work pressure, but the person does not like to stay reserved, the fact she talks in the balcony of the village house is an indication she likes to talk with people. She is not happy because she cannot meet people from the neighborhood. She is also not happy because she cannot attend religious activities. She scored quite high on PSS scale, so she is quite stressed. She does not do any kind of physical activities. Also, household work is mainly done by servants and maids. She gets to know about lockdown news from newspapers and TV channels. She is happy because all the family members are in the home. She looks after her garden as part of her hobby and spends majority of her time playing with grandchildren. She is under medicine, because of high pressure. She has no problems getting medicine, even in villages the supply is still intact. There are no problems in terms of food supply, as she says there is plenty available in village. She says she will visit her daughter after lockdown gets over.

Personality Test Type: The person Belongs mainly to extraversion and neuroticism category.
